

## INVESTMENT NOTICE

From	MFG Invest AD, c UIN: 207055357
To	Shareholders in MFG Invest AD
Regarding	Ownership restructuring in TETMET SAS

TETMET SAS, a company, part of MFG Invest AD's portfolio, has completed an internal ownership restructuring. All shareholders in the French entity have contributed their shares to a newly established company registered in the United States — TETMET INC, 8 The Green, Suite B, Dover, Kent County, Delaware 19901. As a result of this step, the U.S. entity has become the sole owner of the companies registered in France and the Netherlands.

This reorganization is one of the conditions for closing TETMET's upcoming funding round, which is expected to reach approximately USD 10 million, at a post-money valuation of around USD 40 million.

In November 2025, MFG Invest AD made a follow-on investment in the company in the amount of EUR 100,000 (one hundred thousand euros) through a SAFE instrument, which will be converted into equity upon closing of the round.

### **About TETMET**

TETMET is developing ASLM (Adaptive Spatial Lattice Manufacturing), a technology that enables the production of spatial lattice structures through robotic point welding of metal rods, supported by advanced artificial intelligence. This process allows the creation of structural components using 40–70% less material and up to 99% less energy compared to conventional manufacturing methods.

The technology has broad applications, with the company currently focusing on the automotive, aerospace and space industries.

TETMET is entering a new phase of growth with the establishment of its first fully vertically integrated ASLM production facility in the Netherlands. Moving beyond research and pilot projects, the company is scaling its proprietary technology into real industrial manufacturing, combining AI-driven design, advanced laser welding and lattice engineering in a single platform.
